AWS For Beginners (May-2024)

SKILLS

HTML|CSS | Javascript | React Js | Material UI | Tailwind CSS| Bootstrap | Java | Git/Github | Basic of MERN | Problem-solving

PROJECTS

Random Joke Generator (HTML, CSS, JAVASCRIPT) (view)
Employs the Fetch API in JavaScript to make asynchronous requests to a Jokes website API, retrieving and displaying jokes dynamically on the webpage**.**

Weather web app (HTML, CSS, JAVASCRIPT) (view)
Built a user-friendly weather app with HTML, CSS, and JavaScript. It shows current weather from OpenWeatherMap and allows searches by city . The app is responsive and handles errors smoothly.

Shophub E-commerce Website (REACT) (view)
This project involved creating a full-featured e-commerce website using React.The site provides a dynamic and responsive shopping experience, with features such as product listings, renting clothes,shopping cart functionality,and use authentication.
